

Get maximum benefit from your Connections

# Performance Measurement Update

Exactly how effectively does your facility manage pain?

## Audit care and track outcomes so that you know ...

- ✓ Who is in pain
- ✓ Whether a resident's pain is controlled or not
- ✓ If a pain report came from interviews or observation
- ✓ When pain limits activity or impairs sleep
- ✓ What sort of treatment plan has been developed
- ✓ How MDS scores for mood, behavior, and weight loss relate to pain

This is the first in a series of product updates highlighting features and advantages of the various AccuMed Connections and other products.

One report can give you all the answers ...

Presence of Pain/Potential Pain												
Resident Name		Location		New Pain	Pain Presence (J0300/J0800)		Pain Frequency (J0400/J0850)		Pain Attributes (J0500A/J0600B/J0500A/J0500B)			
Nursing Station	Room	Interview	Observe		Interview	Observe	Pain Intensity	Verbal Descriptor	Affects Sleep	Li Ac
